

2023 Annual Report

An equitable world where *all*
people and nature thrive together.

EARTHCORPS.ORG

COVER: CAITLIN'S CREW SUPPORTED ONGOING RESTORATION WORK AT WARREN G. MAGNUSON PARK, ALSO KNOWN AS MAGNUSON PARK.

EARTHCORPS STAFF AND CORPS AT MAGNUSON PARK IN SEATTLE, WA.

LEFT-TO-RIGHT: FOUNDER DWIGHT WILSON, EXECUTIVE DIRECTOR EVLYN ANDRADE, AND FORMER EXECUTIVE DIRECTOR STEVE DUBIEL.

OUR COMMUNITY

A Message from Evlyn

The world is facing unprecedented environmental challenges - and thirty years in, our collective vision of building an equitable world where *all* people and nature thrive together is more critical than ever before. However, as EarthCorps celebrated 30 impactful years of environmental restoration in the Puget Sound region and beyond, I was struck by the optimistic progress and resilience of EarthCorps' incredible global community.

Last year was one of celebration and reflection. Since our foundation in 1993, we have collectively planted 1.25 million native trees and shrubs - protecting and restoring fragile habitats and ecosystems that are home to both creatures and ourselves - removed 1.5 billion pounds of CO2 - ensuring our friends and family have fresh air to breathe - and welcomed 200,000 volunteers eager to protect and restore green spaces in their local communities. Reflecting on these milestones, I cannot begin to express how

grateful I am to be part of a community that not only envisions a healthier world but is actively actualizing one.

This annual report explores how EarthCorps' programs advance local restoration through innovative strategies centered on sustainability, resilience, and collaboration. We continued to foster and cultivate relationships that advance our environmental leadership and training program with hands-on technical opportunities. Collaborating on innovative strategies, we continued to support our Corps by teaching the skills to tackle the world's most pressing environmental challenges. Expanding our programs, we partnered with organizations committed to advancing green opportunities for *all* - elevating the voices of marginalized and frontline communities and defining our community partnership program's priority areas.

As we look toward tomorrow, we are on the precipice of change. Today is a defining moment to not only focus on what we do but how we do it. I see evidence that our collective efforts are working, and I am deeply grateful to you - our partners, supporters, advocates, volunteers, and community. You remain the beating heart of this diverse and growing movement. With the power to progress change, we are on the brink of a greener and more resilient future for *all*. As you read through the stories of last year, I invite you to continue to invest in cultivating leaders and community partnerships to advance environmental justice. Together, we are creating change.

With Gratitude,

Evlyn Andrade
EXECUTIVE DIRECTOR

EarthCorps' **Leadership & Environmental Training Program** teaches technical skills in environmental restoration and leadership.

PROJECT SPOTLIGHT

West Tiger Mountain & East Sunset

EarthCorps designs, constructs, and maintains front and backcountry trails. Partnering with agencies and organizations, the team strategizes innovative and sustainable solutions that preserve natural habitats and delicate ecosystems while increasing access to the outdoors and fostering positive connections between people and nature.

In partnership with Washington State’s Department of Natural Resources (WA DNR), EarthCorps crews supported ongoing backcountry work at West Tiger Mountain and East Sunset in Issaquah, WA - a popular area for outdoor recreation located less than 20 miles from the center of Seattle.

EarthCorps crews reconstructed a portion of the trail that was previously disturbed during timber harvesting, manually removed non-native invasive species, and installed directional signage to help hikers and visitors navigate the dense network of backcountry trails.

CREW MEMBER CASEY MAHLER RECONSTRUCTS
A PORTION OF THE BACKCOUNTRY TRAIL.

SABRINA'S CREW POSES WITH A PILE OF
GRUBBED NON-NATIVE ENGLISH IVY.

“

This was our first week of crew work and doing trail work on top of a mountain was a pretty unique task to start off with!”

Sabrina & Crew
2023 CORPS COHORT

Crews restored **1 acre** - clearing invasive English ivy and installing dozens of survival rings around native conifers.

Crews maintained **.5 mile** of trail - treading the surface by scraping the top organic material and clearing debris from the trail.

Crews constructed **520 feet** of new trail - reconnecting a section of the West Tiger Mountain Trail that was previously logged.

Crews clocked almost **500 crew hours** - supporting work in the dense network of backcountry trails.

UW Floating Wetlands at Shilshole Bay Marina

EarthCorps partners with local agencies, governments, and organizations to pilot and research innovative and sustainable solutions that tackle relevant and pressing environmental challenges. Working alongside the University of Washington's Green Futures Lab, crews supported research to determine if wetland plants could thrive in heavily built environments where traditional environmental restoration practices are impossible.

“

The installation has been a huge success! We are actively working with partners to consider replicating these types of installations based on our current results.”

Nelson Salisbury
SENIOR ECOLOGIST & GIS SPECIALIST

Crews continued work from 2022 and installed a series of “shelter shells” to attract native species to the marina. These prototypes are helping the University of Washington's Green Futures Lab establish best management practices for increasing fish habitat and water filtration systems in urbanized environments.

CREWS INSTALL “SHELTER SHELLS” WITH SENIOR ECOLOGIST & GIS SPECIALIST NELSON SALISBURY AT SEATTLE’S SHILSHOLE BAY MARINA.

PROJECT SPOTLIGHT

Helmick Road

EarthCorps supports strategic restoration strategies that protect and restore the forests and habitats that are home to native species. After negatively impacting the wetlands in 2006, Washington State’s Skagit County named Helmick Road a restoration site and enlisted EarthCorps’ support with a long-term mitigation strategy and plan.

Helmick Road has salmon-bearing tributaries that lead to the Skagit River, so the team focused on installing thousands of native plants to restore salmon habitat, increase understory diversity, and build a healthy foundation for a thriving ecosystem.

Working with EarthCorps Senior Project Manager Anna Jowell, crews strategized how to transport plants across the large restoration site - collaborating on efficient and effective ways to install nearly 5,000 native trees and shrubs.

LEFT-TO-RIGHT: ABI MUTHUSAMY, ANNA JOWELL, KELLIE PRINCE, SABRINA BRITTAIN, AND SAM KING DISCUSS HOW TO TRANSPORT PLANTS.

Crews installed **4,900 native plants**, including Western Red Cedar, Sitka Spruce, Salmonberry, Nootka Rose, Sitka Willow, Red Osier Dogwood, Pacific Ninebark, and Twinberry.

Crews managed **4 acres** of expansive wetland and riparian buffer within a larger 18-acre area, which required careful organization and planning to transport plants across the site.

BOTTOM PHOTO: JADE’S CREW NAVIGATES THE LARGE RESTORATION SITE.

EarthCorps' inaugural Global Learning Summit fostered a global network of learning and community.

EarthCorps collaborates with its expansive alumni network to pilot accessible initiatives and meaningful professional development opportunities. In 2023, EarthCorps partnered with the Trust for Mutual Understanding to host the inaugural Global Learning Summit - a three-day virtual conference for people who care about the planet.

EarthCorps' Global Learning Summit fosters a global community of environmentalists and leaders committed to learning, growing, and sharing innovative and ambitious ideas that support resilience and equity while advancing progress in environmental justice and habitat restoration. Engaging 41 global experts, leaders, and partners from 11 countries, the Global Learning Summit featured 18 virtual panels, presentations, and discussions centered around EarthCorps' three foundational pillars: Leadership, Habitat, and Community.

Across the program, EarthCorps engaged seven partners, developing relationships with four new organizations. Collaborating on presentation topics, EarthCorps supported and hosted panels, including "Dismantling White Supremacy in Outdoor Spaces" and "Preparing the Next Generation of Environmental Leaders." These presentations are a public resource on EarthCorps' YouTube channel and are available to *all* community members.

INTERNATIONAL ALUMS GABIJA SAVICKYTE (LEFT) AND AYOMIDE AROWOSEGBE (CENTER) SUPPORTED THE INAUGURAL GLOBAL LEARNING SUMMIT.

EarthCorps collaborated with **41 global experts**, leaders, and partners on the event design.

The event speakers and panelists represented **11 countries** from around the world.

The Global Learning Summit featured **18 virtual panels**, presentations, and discussions.

EarthCorps engaged **7 partner organizations** - developing new relationships with four partners.

“

In an effort to expand meaningful professional development opportunities to our alumni, we offered this free three-day conference to anyone interested in attending.”

Brandon Riehl
ALUMNI & EDUCATION MANAGER

EVENT SPOTLIGHT

Celebrating 30 years of impact and community at EarthCorps' Revive Reunion.

EarthCorps' central themes were celebration and gratitude - as we celebrated 30 years of incredible environmental impact with our global community.

Founded as the world's first international conservation corps in Seattle, WA, USA, EarthCorps now hosts a global community, which includes 1,800 alumni from approximately 81 countries and 41 U.S. states.

Throughout the year, EarthCorps, with our community, celebrated our past, present, and future by amplifying the voices of community members who have defined and shaped EarthCorps' identity. Sharing stories that exemplify impact, dedication, and resilience - EarthCorps fostered deeper connections while developing new relationships with environmentalists and leaders who envision a more resilient world.

The celebration culminated with a three-day, in-person reunion in Seattle, WA. EarthCorps hosted approximately 400 guests - including supporters, alumni, former staff and board, and community and agency partners - over three days of community events, which included a pub night, a gala, and a volunteer event.

Each event - the welcoming pub night, the annual gala, and the volunteer event - cultivated stronger connections within our community - amplifying and strengthening EarthCorps' vision of an equitable world where *all* people and nature thrive together.

MEMBERS OF THE 2023 CORPS COHORT SUPPORTED THE EVENT SET-UP, PROGRAM, AND TEAR-DOWN.

EARTHCORPS WELCOMED 400 GUESTS AT REVIVE REUNION WHICH WAS HELD AT THE SEATTLE DESIGN CENTER.

WAKULIMA USA HOSTED REVIVE'S VOLUNTEER EVENT AT THEIR URBAN FARM IN KENT, WA.

OUR COMMUNITY

Community Partnerships

In 2023, EarthCorps' Community and Volunteer Engagement Team defined three strategic areas for work. Focusing on cultivating relationships with organizations committed to advancing equitable green opportunities, the team decided to:

- Work with schools, including Tukwila, WA's Foster High School, to co-develop curriculums and create experiential and hands-on learning opportunities and internships.
- Partner with urban farms, including Kent, WA's Wakulima USA, to support BIPOC-led farming groups - creating a dedicated position within EarthCorps' team to support these projects.
- Collaborate with cities and agencies to allocate resources for special projects and capacity building by creating a model that brings technical, financial, and strategic resources to community groups.

COMMUNITY PARTNERS

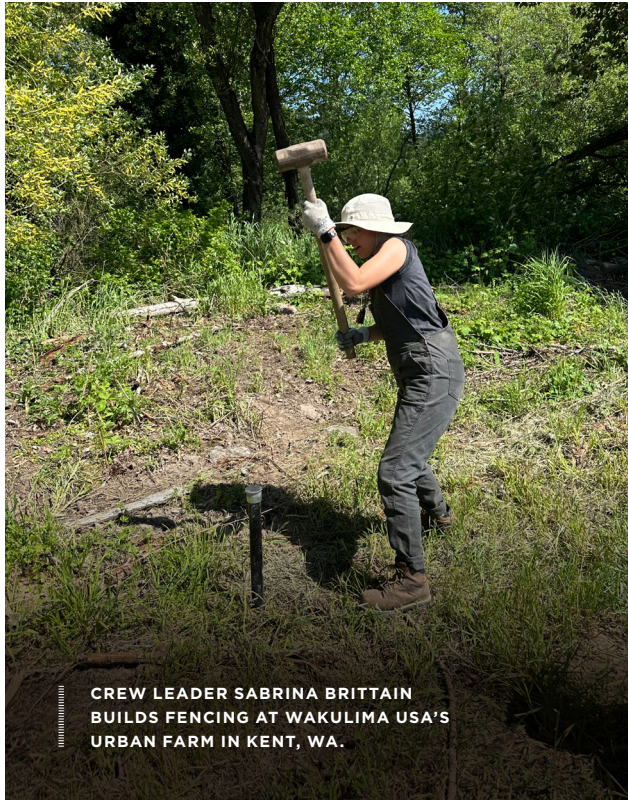

Foster High School

EarthCorps partnered with Foster High School to co-design a curriculum that created more green opportunities and environmental pathways for youth. Piloting the partnership, EarthCorps' International Cohort delivered a presentation to the environmental science class, hosted students in the field for "Shadow-a-Crew" days, and built a community garden at the school.

COMMUNITY PARTNERS

Wakulima USA

Focused on empowering Black, Indigenous, and people of color (BIPOC) youth and immigrants, Wakulima USA promotes equitable access to culturally relevant food and sustainable farming. In 2023, EarthCorps continued the ongoing partnership by helping to purchase and install an irrigation system at the organization's farm, supporting a land proposal, and connecting the urban farm with peer organizations across the county.

COMMUNITY PARTNERS

The City of Tukwila

Supporting the Green Tukwila Partnership, EarthCorps partnered with the City of Tukwila to restore and maintain urban green spaces. After helping to establish Codiga Park 20 years ago, EarthCorps continued restoration work by hosting multiple volunteer events throughout the year.
